

*Wemmel, 20 March 2020*

Dear Partners of EML,

The Covid-19 virus is still aggressively attacking the world and is still affecting us all very hard. As you can read and follow via the different news channels, every country is taking draconic countermeasures to dramatically slowdown the spread of this virus.

Almost all the original equipment manufacturers (OEMs) in the European automotive industry have now, or will within the next few days, suspend their production. Besides the OEMs, most of the EML ports are lowering their productivity and/or stopping their activity.

All of this is expected to have a tremendous impact on EML and our industry. The circumstances in the various ports and countries are continuously monitored and evaluated by the EML team. Our priority is to keep the dialogue open with all the relevant parties so we can find a common solutions to mitigate the impact on all of us as much as possible.

Please find, attached to this mail, our latest sailing schedule based on the current forecasted volumes and different requests.

As there are changes from hour to hour, we hope we can count on your understanding and support in case amendments are needed in the (near) future.

Although all EML staff is obliged by the Belgian Government to work from home we are of course always available via Mobile Phone/Mail/or other channels. Don't hesitate to contact our team at any time for any questions or remarks

On behalf of the entire EML staff,

Take care of yourself and your family. Stay safe.

Euro Marine Logistics.
